

LENA TA W

LENA TA TW

LENA TA WPC

Table composed of two 5 mm-thick steel sheet supports and a table top in hardwood or Thermo-treated pine slats of 40x40 mm (top) and 40x100 mm (sides) or WPC slats, on a 40x20x1.5 mm tubular steel frame and 3 mm thick folded steel sheet ribs.

All metal parts are galvanised and coated with thermosetting polyester powder.

The hardwood is treated with water-based pigmented impregnation, while thermo-treated pine is supplied not impregnated (impregnation available as an option).

All fixings are in AISI304 stainless steel.

Prepared with holes Ø 12 mm at the base for ground fixing with mechanical dowels (not included).
